DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-15, drawn to grayscale display by means of spatial and pulse-width modulations, classified in class 345, subclass 691 & 694.
 - II. Claims 16-22, drawn to grayscale display by means of amplitude and pulse-width modulations, classified in class 345, subclass 690, 691 & 212.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I achieves grayscale display without the need of amplitude modulation and invention II achieves grayscale display without the need of spatial modulation. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
